**the ultimate airway
for all first-line airway
interventions and starved
elective anaesthesia**

**Airway management
made simple...**

~ tulip

- Increased O₂ provision
- Increased CO₂ elimination
- Softest Cuff Pressure
- Widest Breathing Tube
- Reduced Resistance
- Reduces Risk of Regurgitation
- Low Stimulation
- Awake Self Extubation
- Bronchoscopy
- Upper GI Endoscopy
- Endotracheal Tube – 7.0mm
- Flexible Tube for Easy Insertion

~ tulip

- Semi Conscious Use
- Self Extubation
- + >100% O2 Provision
- + > 100% CO2 Elimination
- + > 77% Tidal Volume
- Increased IPPV
- Reduced Peak Pressure
- Largest Airway Tube
- Reduced Resistance
- Smallest IPPV airway
- Directly Connected
- Hands Free

Broad use for Scopes and Surgeries, Bronchoscopes, Upper GI Endoscopy, Endotracheal Intubation and all first-line airway interventions including Starved Elective Anaesthesia.

Patient Size and Sex	Small Child	Small Child	Small Adult	Medium Adult	Large Adult	X Large Adult	Maximum Inflation
Patient Weight Approx.	10-20Kg	0-40kg	40-60kg	60-80kg	80-100kg	>100kg	
Inflation Volume Approx.	+/- 30mls	+/- 40mls	+/- 50mls	+/- 60mls	>+/- 60mls	> 60mls	80mls max
Inflation Pressure Approx.	50cmH2O 40mmHg	50cmH2O 40mmHg	50cmH2O 40mmHg	50cmH2O 40mmHg	50cmH2O 40mmHg	50cmH2O 40mmHg	50cmH2O 40mmHg
Colour and Size	Blue Size 0	Yellow Size 1	Green Size 2	Orange Size 3	Red Size 4	White Size 5	Monitor Cuff Pressure
